SUMMARY

I have been working as a web developer since 2010, the period during which I have worked in different environments, from big consultancy companies to start-ups. I am a self-motivated and self-taught professional who likes to solve problems.

I merge a passion for usability and user experience with technical knowledge to create cool digital experiences. My expertise covers not only frontend, but also backend development.

I know many programming languages and tools such as Python, PHP, D3.js, Laravel, WordPress, MySQL, and more.

I'm a creative thinker and a quick learner.
I spend 30 minutes every day to learn about new technology or trends.
